

C1

SMELL: BLOCKED NOSE

BIG QUESTION: What is taste and what is flavour?

Can you describe the difference between a taste and a flavour?

You are going to take part in an activity to help you understand the difference between taste and flavour. You will need to follow the instructions carefully...

You will need two hands free. Next, hold a spoon with the hand you normally use. Then hold your nose with your free hand and keep holding until you are told to let go. **YOU MUST NOT CHEAT!** Otherwise the experiment won't work

Your teacher will give you a spoonful of sugar; you should put it in your mouth and allow the mixture to dissolve

Put your hand up when you taste a sweet taste.

When everyone can taste a sweet taste, you can let go of your nose!

What can you taste now?
